

RECYCLE GROUP

CAPABILITY STATEMENT · 2026

EVERY MATERIAL. EVERY SECTOR. ONE GROUP.

Recycle Group is an Australian-owned recycling solutions company. We specialise in high-volume mainstream recyclables — and in the challenging, diverse and complex downstream solutions that business, government and industry need: councils, rail, ports and airports, major construction and listed companies.

90+

material streams separated under cover

250k+

mattresses recycled a year

99%

mattress recovery rate

41,580 m³

polystyrene recovered in the last twelve months

WHAT WE DO

WE PROCESS IT ALL OURSELVES.

01 TRANSFER STATION MANAGEMENT

Full management of public transfer stations for councils and operators — site, weighbridge, separation, processing and reporting.

03 COMMINGLED, FOOD & ORGANIC WASTE

Ongoing services across port precincts and other large, busy sites.

05 CLEAN FILL & TOPSOIL

Recycled instead of landfilled. One Victorian developer's 60,000 m³ of topsoil — 20,000 m³ went back as beautification.

02 HIGH-VOLUME MATERIAL RECYCLING

Steel and coloured metals, cardboard, plastic, polystyrene and timber — processed on our own sites and returned to market as commodities.

04 CLEAN-UPS & CLEARANCES

Burnt-out and abandoned cars for road operators; dumped material, corridor, park and rail-yard clearances.

06 SHIPPING, CRATING & EXPORT

Covers, pallets and steel for shipping companies; crating with trans-global partners; licensed export of processed polystyrene.

WHO WE WORK WITH

PUBLIC SECTOR, INFRASTRUCTURE, INDUSTRY.

COUNCILS

GOVERNMENTS

PROPERTY DEVELOPERS

NATIONAL PARKS

STATE ROAD OPERATORS

RAIL & TERMINALS

PORTS

AIRPORTS

TUNNEL & INFRASTRUCTURE CONSTRUCTION

SHIPPING COMPANIES

TRANS-GLOBAL PARTNERS

CORPORATIONS & RETAILERS

PROPERTY MANAGERS

EIGHT RECYCLING OPERATIONS, BUILT TO RUN ANYWHERE IN AUSTRALIA.

MATTRESS RECYCLING

About 38 seconds per mattress; spring steel separated 99% free of fabric.

RESOURCE RECOVERY CENTRES

90+ streams under cover, six days a week; public and trade drop-off.

METAL RECYCLING

Steel and coloured metals sorted, baled and exported as commodities.

SHREDDING

Residual cut to a quarter of its original volume.

AUSTRALIA'S FASTEST-GROWING POLYSTYRENE PLANT

300+ m³ a day; three shipping containers of foam into one washing-machine-sized cube.

CARDBOARD RECOVERY

Conveyors and balers on site; baled, containerised and exported.

TIMBER RECOVERY

Pallets, dunnage and plain timber separated from mixed loads.

ORGANICS

Food, green and organic waste, including port precinct services.

AUSTRALIA CAN'T BURN ITS WAY OUT OF WASTE.

Waste-to-energy is tightly restricted here — capped and licensed facility by facility in Victoria. So the answer has to be recycling: diverse, practical pathways for every stream, designed and run on our own sites. In development: mattress pulp tested as noise walls and erosion control fabric.

CERTIFIED SYSTEMS

ACCREDITATIONS

ISO 9001:2015 Quality management	ISO 14001:2015 Environmental management
ISO 45001:2018 Health & safety	AS/NZS 5377 E-waste handling
NIST 800-88 Media sanitisation	EPA Victoria Registered sites

Every figure comes from a weighbridge ticket. Diversion statements by site and period, with residual reported in full. Asbestos and hazardous waste are not accepted.
